SMARTconnect

Smart integration into all sound systems

Radio receiver with integrated signal converter

The NewTec SMARTconnect allows for the integration of all common amplifier systems or active speakers into the NewTec SMART Audio System, as well as the integration of passive speakers. The music signal transmitted by the SMARTplayer is received by the SMARTconnect and converted into a line signal, or amplified The SMARTconnect, like all SMART Audio products, receives music via the reliable and interference-free 1.9 GHz nDect protocol.

Product Codes

200708	SMARTconnect - WHITE

Technical Data

Application

Radio receiver for integrating external components into SMART Audio

Design

Colours	○
Dimensions	140 x 40 x 115 mm
Material housing	ASA painted

Sound

Radio frequency	1,9 GHz n-DECT
Audio output	3.5 mm TRS Mono line OUT 40W 4Ω Speaker OUT

Installation

Weight	240 g
Power supply	AC 100-240V / DC 12V / 2 A
Power connections	Power supply unit (included in the scope of delivery)
Power consumption	Max. 20 watts
