# SMARTstreamer

## Network audio player

Stream HiFi audio via network

The CONOWAVE SMARTstreamer, to be used as a professional network audio player, transmits the audio signal via an existing network infrastructure to one or more CONOWAVE SMARTplayers. Due to the transmission via the LAN network, even very large distances can be bridged without any loss of quality. The audio source can be fed in analogue or digital via the network or internet.

The music is transmitted via a high-resolution audio codec in 48kHz with 16 bits.

### Product Codes

| | |
|---|---|
| 200703 | SMARTstreamer - SILVER |

## Technical Data

### Application

Network audio player of the SMART Audio System

### Design

| | |
|---|---|
| Colours | |
| Dimensions | 140 x 40 x 115 mm |
| Material housing | ASA painted |

### Sound

| | |
|---|---|
| Music transmission | 48,000 Hz/16Bit (20 Hz - 20 kHz) |

### Installation

| | |
|---|---|
| Weight | 220 g |
| Power supply | AC 100-240V / DC 5V / 1A |
| Power connections | Power supply unit (included in the scope of delivery) |
| Connections | LAN: Ethernet port RJ45, 100Mbit/s<br>RCA Stereo IN (RCA) |
