CONO luna SMART

Smart wireless speaker for shelf and wall use

The audio solution for shelf and wall applications with state-of-the-art wireless technology

The CONO luna SMART is a wireless speaker designed for shelf or wall use, featuring an integrated bass driver and digital amplifier. Music is transmitted wirelessly via the 1.9 GHz band from the NewTec SMARTplayer, with a range of up to 120 meters (line of sight) and 40 meters indoors. Any number of speakers can be used within the system. The volume of each individual speaker can also be adjusted during operation via remote control. The speaker housing is made of ABS.

Product Codes

200582	CONO luna SMART - WHITE
200583	CONO luna SMART - BLACK

Technical Data

Application Wireless speaker for shelf and wall use

Design

Colours	● ○
Dimensions	143 x 140 x 278 mm
Material housing	ABS plastic

Sound

Principle	360° - Speaker with integrated amplifier, passive bass membrane and wireless module
Output power	40 W RMS
Equipment	NewTec KA10 loudspeaker 50W 4Ω
Efficiency	85,5 dB
Max. SPL	103,5 dB
Frequency response	50-21.000 Hz
Radio frequency	1,9 GHz n-DECT (frequency band: 1880-1900 MHz)
Transmitter	SMARTplayer

Installation

Weight	1.65 kg
Power supply	AC 100-240 V; 50/60 Hz; 2.5 A
Connections	Power cable with IEC 60320 C8 connector
