SUB quadro SMART

The smart subwoofer

Noble bass in the lighting track

The active wireless subwoofer gives all music sources a solid bass foundation and is therefore the perfect addition to the CONO SMART series. This model is a downfire subwoofer that emits the sound onto the floor or wall in order to transfer the highest possible sound pressure to the room structure. Any number of subwoofers can be used.
The subwoofer is prepared for wall mounting, but can also be placed on the floor, for example under furniture.

Product Codes

200602	SUB quadro SMART - WHITE
200603	SUB quadro SMART - BLACK
