

# CONO luna SMART

## Smart wireless speaker for shelf and wall use

The audio solution for shelf and wall applications with state-of-the-art wireless technology

The CONO luna SMART is a wireless speaker designed for shelf or wall use, featuring an integrated bass driver and digital amplifier. Music is transmitted wirelessly via the 1.9 GHz band from the NewTec SMARTplayer, with a range of up to 120 meters (line of sight) and 40 meters indoors. Any number of speakers can be used within the system. The volume of each individual speaker can also be adjusted during operation via remote control. The speaker housing is made of ABS.

## Technical Data

### Application

Wireless speaker for shelf and wall use

### Design

Colours	● ○
Dimensions	143 x 140 x 278 mm
Material housing	ABS plastic

### Sound

Principle	360° - Speaker with integrated amplifier, passive membrane and wireless module
Output power	40 W RMS
Equipment	NewTec KA10 loudspeaker 50W 4Ω and passive bass membrane
Efficiency	85.5 dB
Max. SPL	103.5 dB
Frequency response	50-21.000 Hz
Radio frequency	1,9 GHz n-DECT
Transmitter	SMARTplayer

### Installation

Weight	1.65 kg
Power supply	AC 100-240 V; 50/60 Hz; 2.5 A
Connections	Power cable with IEC 60320 C8 connector
